Summary

I'm Ramjan, a MERN Stack Developer with experience in React, Node.js, Express.js, and MongoDB. Passionate about creating scalable and performant web applications. Collaborated with cross-functional teams to deliver high-quality products on tight deadlines.

Skills

- **Front-End Technologies:** HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Redux Toolkit (RTK), Zustand, Tailwind CSS
- **Back-End Technologies:** Node.js, Express.js
- **Databases:** MongoDB, PostgreSQL
- **Tools & Platforms:** Git & GitHub

Educational Qualification

❖ Master of Science (Engg)

Institution : Islamic University, Kushtia
Major : Information & Communication Technology (ICT)
Result : CGPA: 3.58

❖ Bachelor of Science (Hons)

Institution : Islamic University, Kushtia
Major : Information & Communication Technology (ICT)
Result : CGPA: 3.39

Professional Experience

MERN Stack Developer

Softvence Agency — Level 6–7, Medona Tower, 28 Bir Uttam AK Khandakar Rd, Dhaka 1212
January 2024 – Present

- Developing and maintaining modern, responsive web applications using React.js, Next.js, and TypeScript.
- Building RESTful APIs with Node.js and Express.js, integrating MongoDB and PostgreSQL for robust data handling.
- Designing and implementing microservice-based architectures for scalable and modular web applications.
- Developing Learning Management Systems (LMS) with role-based access, real-time data synchronization, and performance optimization.
- Implementing advanced state management using Redux Toolkit (RTK) and Zustand.
- Collaborating closely with UI/UX designers and cross-functional teams to deliver high-quality, scalable software solutions.
- Managing version control, CI/CD, and project workflows using Git and GitHub.
- Participating in sprint planning, code reviews, and optimizing application performance across the stack.

My Projects

1. Block Graph — Draggable Parent–Child Visualizer (React, TS, Tailwind)

Draggable blocks with dynamic dashed connectors. Blocks spawn randomly, update in real time when dragged, and use lightweight custom state management. -- [Live](#) | [GitHub](#)

2. Recursive Partitioner — Dynamic Split-View System (React, TS, Tailwind)

Interactive panel layout tool supporting recursive vertical/horizontal splits, color-coded panels, deletion, and draggable resizing with smart snapping. -- [Live](#) | [GitHub](#)

3. Relationship Visualizer — Real-Time Graph Renderer (React, TS, Tailwind)

Automatically detects valid person objects from live input and renders them as graph nodes with age-based styling. Updates instantly as text changes, removing invalid nodes with no errors. -- [Live](#) | [GitHub](#)

4. Doctor Appointment System — MERN (MERN, Cloudinary, JWT, Stripe)

Role-based system (Admin/Doctor/Patient) for scheduling, profile management, and Stripe-based payments. Includes full auth and appointment management. -- [Live](#) | [GitHub](#)

5. E-Commerce App — MERN (MERN, Cloudinary, JWT, Stripe)

Full e-commerce platform with product management, secure authentication, filtering/sorting, and Stripe payments. Supports admin dashboard and smooth shopping flow. -- [Live](#) | [GitHub](#)
